SUBJECT INDEX

Ability to drive
estimate of, in relation to self-estimated and measured blood-alcohol concentration in Swiss soldiers: a letter to the Editors 104
Abstinence
role of improvement of with adjuvant acamprosate in the long-term costs of alcoholism 478
stressors as predictors of 307
transient increase in platelet monoamine oxidase B activity during early, in alcoholics: implications for research 377
Acamprosate
and relapse prevention in the treatment of alcohol dependence: a placebo-controlled study 202
kinetic study of absorption of in rat small intestine 324
the long-term cost-effectiveness of improving alcohol abstinence with adjuvant 478
United Kingdom Multicentre Acamprosate Study (UKMAS): a six-month prospective study
of acamprosate versus placebo
in preventing relapse after withdrawal from alcohol 176
Acetaldehyde
adducts of, with proteins in liver and blood of rats fed the Lieber–DeCarli ethanol-containing liquid diets 164
influence of chronic alcohol ingestion on depression of cardiac contractile function induced by, in rats 554
possible involvement of in the induction by ethanol of heart left ventricular atrial natriuretic peptide (ANP) gene expression in rats 331
production of, and metabolism to acetate by human indigenous and probiotic *Lactobacillus* and *Bifidobacterium* strains 561
role of in histone glycation in diabetic rats 145
Acetaldehyde–protein adducts
evidence of formation of, in rat brain after lifelong consumption of ethanol 458
Acetate
production from acetaldehyde by human indigenous and probiotic *Lactobacillus* and *Bifidobacterium* 561
Acute ethanol consumption
effects of on androgen levels in premenopausal women 84
Addiction research
the concept of abnormal hemispheric organization in 394
Adducts
of proteins and direct and indirect ethanol metabolites in liver and blood of rats fed the Lieber–DeCarli ethanol containing liquid diets 164
Adenylyl cyclase
activity is increased in younger, but decreased in older, alcoholic patients after detoxification 249
Adrenalectomy
effects of, and exposure to corticosterone on alcohol intake in alcohol-preferring AA and alcohol-avoiding ANA rat lines 139
Affective state
a pilot investigation of the effect of tryptophan manipulation on, in male chronic alcoholics 49
Age of onset
of alcoholism and platelet serotonin uptake 390
Ageing
cerebellar Purkinje neurons with altered terminal dendritic segments are present in all lobules of the cerebellar vermis of, in ethanol-treated F344 rats 35
effects of, on adenylyl cyclase activity in lymphocytes of alcoholic patients 249
Aggression
gender differences in alcohol-induced 471
Alcohol
a paradigm to test a drug-induced aversion to 435
alterations in preimplantation *in vivo* development after preconceptional chronic moderate consumption of in female mice 336
and porphyrin metabolism: an Invited Review 109
compliance rate and associated factors for entering an, brief intervention treatment programme 372
drinking patterns of among Swedish women: from a 5-year follow-up of a population-based study 520
effects of moderate consumption of on female hormone levels and reproductive function: a review 417
evidence of acetaldehyde–protein adduct formation in rat brain after lifelong consumption of ethanol 458
gender differences in aggression induced by 471
impairs speed of information processing and simple and choice reaction time, and differentially impairs higher order cognitive abilities 197
problem drinking among hospitalized patients in Hungary 574
quantification of mortality related to, in Sweden 601
response to, in daughters of alcoholics: a pilot study and a comparison with sons of alcoholics 242
suicide in misusers and non-misusers of, in a Finnish nationwide population 70
use and misuse, general practice nurses' knowledge of: a questionnaire survey 259
Alcohol and Alcoholism
a tribute to the Medical Council on Alcoholism and its journal, as we enter the new millennium: an Editorial 1
the journal of the Medical Council on Alcoholism: an invited special article by a previous Editor 3
Alcohol and drug use
a comparison of, between female inmates and those in treatment 60
Alcohol consumption
balance between harm and protection due to, does not favour a recommendation to drink in Sweden 601
correlation of, and body weight, to liver volume 531
do drinking surveys predict changes in population-based alcohol problem indicators? 255
effects of on the progression of hepatitis C virus infection and risk of hepatocellular carcinoma in Japanese patients 286
effects of with an evening meal on shear-induced platelet aggregation and urinary excretion of prostanoids 594
hazardous, and patterns of drinking in Thai men 263
potential monitoring of recent, by determination of ethyl glucuronide in hair samples: letter to the Editors 313
stressors as predictors of 307
Alcohol dehydrogenase
frequency and Markov chain analysis of the amino acid sequence of the α-chain of 302

Alcohol dependence
a multicentre, randomized, double-blind, placebo-controlled trial of naltrexone in the treatment of 587
and patterns of drinking in Thai men 263
naltrexone exerts a favourable effect on plasma lipids in abstinent patients with 91
outcome after in-patient detoxification for: a naturalistic comparison of 7 versus 28 days stay 580
pharmacotherapy of, a Review 537
risk factors for: a case-control study 190
Alcohol-dependent individuals
effects of ritanserin on moods, sleep, vigilance, clinical impression and social impression and social functioning in 384
clinical correlates of cigarette smoking and nicotine dependence in 171
Alcohol-dependent patients
with neuroendocrine evidence of decreased dopamine D2 receptor function, also have a low platelet monoamine oxidase (MAO)-B activity: a letter to the Editors 210
Alcohol drinkers
serum carotenoids are associated with increased lung cancer risk among, but not among non-drinkers in a cohort of tin miners 355
Alcohol education
for general practitioners in the UK — a window of opportunity?: an Invited Review 225
Alcohol intake
effects of adrenalectomy and exposure to corticosterone on, in alcohol-preferring AA and alcohol-avoiding ANA rat lines 139
reduction of, in three strains of alcohol-preferring rats, by a combination of small doses of naltrexone, fluoxetine and a TR analogue 76
Alcohol misuse
education general practitioners about, in the UK: an Invited Review 225
Alcohol-preferring
AA rats, Effects in and in alcohol-avoiding ANA rats, of adrenalectomy and exposure to corticosterone on alcohol intake by 139
Alcohol problems
do drinking surveys predict changes in population-based indicators of? 255
implementation and dissemination of methods for prevention of, in primary health care: a feasibility study 525
Alcohol research
the role of in alcoholism treatment 10
Alcohol use disorders
a measure of the intensity of response to alcohol to screen for, in primary care 625
Alcohol withdrawal
and hypokalaemia: A case report 188
elevated plasma homocysteine levels in 351
is single daily dosage of diazepam as effective as chlordiazepoxide in divided doses in, a pilot study: a letter to the Editors 212
United Kingdom Multicentre Acamprosate Study (UKMAS): a six-month prospective study of acamprosate versus placebo in preventing relapse, after 176
Alcohol-withdrawal syndrome
rat liver tryptophan pyrrolase activity and gene expression during the 427
Alcoholic patients
adenylyl cyclase activity in, as a function of age 249
cytochrome *P*-450 2E1 activity in, as related to parameters of oxidative stress 98
mechanisms of hyponatraemia in 612
Alcoholics
a pilot investigation of the effect of tryptophan manipulation on the affective state of male chronic 49
autonomic reactivity to mental stressors after single administration of lorazepam in male, and healthy controls 617
side-bias in, and heroin addicts 381
transient increase in platelet monoamine oxidase B activity during early abstinence in: implications 377
with the dopamine receptor DRD2 A1 allele have a lower platelet monoamine oxidase-B activity than those with the A2 Allele: a preliminary study 493
Alcoholism
a rat model of, in which forced ethanol stimulates and inhibits its own intake 446
a review of the role of valproate in the treatment of sedative–hypnotic withdrawal and for relapse 319
ESBRA: passport for the development of biological research on, inside Europe: an invited special article 7
gender and peripheral neuropathy in chronic: a clinical–electroneurographic study 368
handedness in types of 394
one hundred years of alcoholism in the twentieth century: an invited special article 10
pharmacotherapy of: gaps in knowledge and opportunities for research: a Review 537
platelet serotonin uptake is higher in early-onset than late-onset 390
regulation of manganese superoxide dismutase (Mn-SOD) in chronic experimental: effects of vitamin E-supplemented and -deficient diets 159
the Collaborative Study on the Genetics of (COGA): a pilot study and a comparison with sons of alcoholics of the response to alcohol of daughters of alcoholics 242
the long-term cost-effectiveness of improving abstinence rates in, with adjuvant acamprosate 478
the Plinius Maior Society for research and treatment of, in Europe: its work in relation to science, practice and patient needs: an invited special article 16
Aldehyde dehydrogenase
a paradigm to test a drug-induced aversion to ethanol for potential inhibitors of activity of 435
application of cross-impact analysis to the relationship between the 2 allele of, and flushing syndrome 55
Amino acid sequence
frequency and Markov chain analysis of, of human alcohol dehydrogenase α-chain 302
Amino acids
effects of ethanol on extracellular levels of, in high- and low-alcohol sensitive rats: a microdialysis study 548
γ-Aminobutyric acid
role of and its type A receptor in sedative–hypnotic withdrawal 319
δ-Aminolevulinic acid
effects of ethanol on, dehydratase, and synthase 109
Anandamide
are, and cannabinoid receptors involved in ethanol tolerance? A review of the evidence 126

Androgens
effects of acute alcohol intake on plasma levels of in premenopausal women 84
Anticonvulsants
use of (including valproate) in the treatment of sedative–hypnotic withdrawal and for relapse prevention, a review 319
Antioxidant defences
Indices of in alcoholic patients in relation to cytochrome *P*-450 2E1 induction and oxidative stress 98
Apomorphine-induced growth hormone release
as a test of dopamine (DA) D2 receptor function, is blunted in alcohol-dependent patients with low platelet monoamine oxidase (MAO)-B activity: a letter to the Editors 210
Apoptosis
activation of neutral sphingomyelinase participates in ethanol-induced, in Hep G2 cells 569
Atrial natriuretic peptide (ANP)
possible role of acetaldehyde in the induction by ethanol of the gene expression of in rat heart left ventricles 331
Attrition
in a follow-up study of DWI (driving while intoxicated) offenders: who is lost? 464
AUDADIS questionnaire
the use of the alcohol dependence section of the Alcohol Use Disorders and Associated Disabilities 263
Autonomic reactivity
to mental stressors after single administration of lorazepam in male alcoholics and healthy controls 617
Aversion
a paradigm to test drug-induced to alcohol 435
Beer potomania syndrome
as a cause of hyponatraemia in some alcoholic patients 612
Benzodiazepines
is single daily dosage of diazepam as effective as divided doses of chlordiazepoxide in the treatment of alcohol withdrawal — a pilot study: a letter to the Editors 212
use of in sedative–hypnotic withdrawal 319
Bias
side, in alcoholics and heroin addicts 381
Bifidobacterium
acetaldehyde production and metabolism by human indigenous and probiotic strains of *Lactobacillus* and 561
Bioelements
effect of short-term ethanol administration on cadmium retention and bioelement metabolism in rats continuously exposed to cadmium 439
Blood-alcohol concentration
relationship of measured and self-estimates of, with self-estimated ability to drive by Swiss soldiers: a letter to the Editors 104
Body weight
correlation of, and also alcohol consumption, to liver volume 531
Brief intervention
compliance rate and associated factors for entering an alcohol programme of 372
Cadmium
effect of short-term ethanol administration on retention of, and bioelement metabolism in rats continuously exposed to cadmium 439
Calcium ion transients
acute ethanol treatment decreases intracellular, in mouse single skeletal muscle fibres *in vitro* 134
changes in, in relation to the influence of chronic ethanol ingestion on acetaldehyde-induced depression of rats 554
Cannabinoid receptors
are, and anandamide involved in ethanol tolerance? A review of the evidence 126
Cannabis use
as a significant factor in outcome after in-patient detoxification for alcohol dependence: a naturalistic comparison of 7 versus 28 days stay 580
Carnosine
effects of, and related compounds, on the stability and morphology of erythrocytes from alcoholics 44
Carotenoids
association of serum with increased lung cancer risk among alcohol drinkers, but not among non-drinkers, in a cohort of tin miners 355
Caspase-3
activity of, in Hep G2 cells in relation to ethanol-induced apoptosis 569
Cerebral salt-wasting syndrome
as a cause of hyponatraemia in some alcoholic patients 612
Children of alcoholics
the specificity of disrupted processes in families of adult 361
Chlordiazepoxide
is single daily dosage of diazepam as effective as divided doses of, in alcohol withdrawal — a pilot study: a letter to the Editors 212
Chlorzoxadone
use of gas as an index of cytochrome *P*-450 2E1 activity in alcoholic patients in relation to oxidative stress 98
Cigarette-smoking
clinical correlates of and nicotine dependence in alcohol-dependent men and women 171
Clinical correlates
of cigarette smoking and nicotine dependence in alcohol-dependent men and women 171
Cloninger's typology
of alcoholism and abnormal hemispheric organization 394
Cognition
alcohol impairs speed of information processing and simple and choice reaction time, and differentially impairs higher order cognitive abilities 197
dissociable cognitive impairments in problem drinkers 52
Combination pharmacotherapy
a mixture of small doses of naltrexone, fluoxetine and a TRH analogue (TA-0910) reduces alcohol intake in three strains of alcohol-preferring rats 76
Compliance
rate and associated factors for entering an alcohol brief intervention treatment programme 372
Computerized tomography (CT)
use of in the correlation of liver volume in patients with body weight and alcohol consumption 531
Concomitant psychiatric disorders
ritanserin does not improve symptoms of in detoxified alcohol-dependent individuals 384

Consumption
effects of pregnancy and progesterone on the, of ethanol by the high ethanol-preferring (HEP) rat 344
Coproporphrinogen oxidase
effects of ethanol on 109
Corticosterone
effects of adrenalectomy and exposure to, on alcohol intake in alcohol-preferring AA and alcohol-avoiding ANA rat lines 139
Cost-effectiveness
the long-term, of improving alcohol abstinence with adjuvant acamprosate 478
Craving
effect of naltrexone on, in a multicentre, randomized, double-blind, placebo-controlled trial of naltrexone in the treatment of alcohol dependence 587
Cross-impact analysis
application of, to the relationship between the aldehyde dehydrogenase 2 allele and the flushing syndrome 55
Cytochrome *P*-450 2E1 (CYP2E1)
activity of in alcoholic patients in relation to oxidative stress 98
Day-patient care
detoxification from alcohol: a comparison of home detoxification and hospital 66
Degeneration
concept of, and addiction and temperance in alcoholism 10
Dendritic terminals
of cerebellar Purkinje neurons are altered in all lobules of the cerebellar vermis of ageing and ethanol-treated Fisher F344 rats 35
Dependence
acamprosate and relapse prevention in the treatment of alcohol: a placebo-controlled study 202
alcohol, as a risk factor for suicide: a Finnish nationwide survey of alcohol misusers and non-misusers in relation to 70
Detoxification
a comparison of home and hospital-based day-patient, from alcohol 66
outcome after in-patient, for alcohol dependence: a naturalistic comparison of 7 versus 28 days stay 580
Development
abnormalities in embryo *in vivo* after preconceptional chronic moderate alcohol consumption in female mice 336
developmental aspects of intestinal intraepithelial and lamina propria lymphocytes in the rat following placental and lactational exposure to ethanol 25
pre-, peri- and postnatal developmental risk factors in alcoholism 394
Diabetes
streptozotocin-induced, effect of ethanol on histone glycation in diabetic rats 145
Diagnosis
a new instrument, the 4-digit diagnostic code, for diagnosing the full spectrum of the fetal alcohol syndrome 400
fetal alcohol syndrome prevention through. II. A comprehensive profile of 80 birth mothers of children with fetal alcohol syndrome 509
primary prevention of the fetal alcohol syndrome through: I. Identification of high-risk birth mother through the diagnosis of their children 499
Diazepam
is single daily dosage of as effective as chlordiazepoxide in divided doses in alcohol withdrawal 212
Differentiation
ethanol inhibits skeletal muscle cell proliferation and delays its, in cell culture 236
Disease
concept of alcoholism, a review of alcoholism in the twentieth century 10
use of, modelling in determining the long-term cost-effectiveness of improving alcohol abstinence with adjuvant acamprosate 478
Dissemination
and implementation of methods for prevention of alcohol problems in primary health care: a feasibility study 525
Dopamine
alcoholics with the A1 allele of, DRD2 receptor have a lower platelet monoamine oxidase-B activity than those with the A2 allele: a preliminary study 493
evidence that decreased function of, D2 receptor in alcohol-dependent patients is associated with low platelet monoamine oxidase (MAO)-B activity: a letter to the Editors 210
role of dopaminergic reward system in alcohol dependence 10
Drinking
habits of subjects with HCV-related chronic liver disease: prevalence and effect on clinical, virological and pathological aspects 296
patterns among Swedish women: results from a 5-year follow-up of a population-based study 520
patterns and setting in Thai men 263
problem, among hospitalized patients in Hungary 574
relationship of, behaviour to ethyl glucuronide in human hair 283
surveys do they predict changes in population-based alcohol problem indicators? 255
Driving
attrition of drunk drivers in a follow-up study of driving while intoxicated (DWI) (DUI) offenders: who is lost? 464
self-estimates of, ability in relation to perceived and measured blood-alcohol concentrations by Swiss soldiers: a letter to the Editors 104
Drug-induced
aversion to ethanol: a paradigm to test 435
Electrolyte abnormalities
hyponatraemia and other disorders in alcoholic patients 612
Embryo
alterations in preimplantation *in vivo* development of after preconceptional chronic moderate alcohol consumption in female mice 336
Erythrocytes
effects of carnosine and related compounds on the stability and morphology of, from alcoholics 44
ESBRA
(European Society for Biomedical Research on Alcoholism): passport for the development of biological research on alcoholism inside Europe: an invited special article 7
Ethanol
activation of neutral sphingomyelinase participates in apoptosis in Hep G2 cells induced by 569
acute effects of growth hormone in rats fed 148
are anandamide and cannabinoid receptors involved in tolerance to? A review of the evidence 126

cerebellar Purkinje neurons with altered terminal dendritic segments are present in all lobules of the cerebellar vermis of ageing F344 rats treated with 35
comparison of the formation of proteins modified by direct and indirect metabolites of, in the liver and blood of rats fed the Lieber–DeCarli liquid diet 164
effect of on histone glycation in diabetic rats 145
effect of short-term administration of on cadmium retention and bioelement metabolism in rats continuously exposed to cadmium 439
effects of on extracellular amino acid levels in high- and low-alcohol sensitive rats: a microdialysis study 548
effects of pregnancy and progesterone on the consumption of, by the high ethanol-preferring (HEP) rat 344
forced, stimulates and inhibits its intake in a rat model of alcoholism 446
influence of chronic ingestion of, on acetaldehyde-induced depression of rat cardiac contractile function 554
inhibits skeletal muscle cell proliferation and delays its differentiation in cell culture 236
low levels stimulate and high levels decrease phosphorylation in microtubule-associated proteins in 452
metabolism to acetaldehyde by human indigenous and probiotic *Lactobacillus* and *Bifidobacterium* strains 561
reversal of ethanol-induced hepatic steatosis and lipid peroxidation by taurine: a study in rats (a letter to the Editors) 215
role of acetaldehyde in the induction by of rat heart left ventricular atrial natriuretic peptide (ANP) gene expression 331
role of Kupffer cells in the release of nitric oxide and change in portal pressure after perfusion of, in rat liver 31

Ethanol metabolism
effects of methylene blue on, in man, rat and rat isolated hepatocytes 424

Ethyl glucuronide
detection of, in human hair 283
potential use of measurement of, in hair samples in monitoring alcohol consumption: letter to the Editors 313

Europe
ESBRA: passport for the development of biological research on alcoholism inside: an invited special article 7

Excitation–concentration coupling
effects of ethanol *in vitro* on, through decreased intracellular calcium ion transients in single mouse skeletal muscle fibres 134

Families of alcoholics
the specificity of disrupted processes in, of adult children of alcoholics 361

Family stressors
role of in disrupted processes in families of adult children of alcoholics 361

Females
a comparison of substance use by female inmates with female substance misusers in treatment 60
can show as much aggression as males irrespective of alcohol consumption 471
effects of moderate alcohol consumption on hormone levels and reproductive function: a review 417

Ferrochelatase
effects of ethanol on 109

Fetal alcohol syndrome
primary prevention of through diagnosis. II. A comprehensive profile of 80 birth mothers of children 509
primary prevention of through diagnosis: I. Identification of high-risk birth mothers through the diagnosis of their children 499
the origins of a moral panic 276

Fibrinogen
effects of alcohol and food on 594

Fibrosis
progression of to cirrhosis and the risk of hepatocellular carcinoma in Japanese patients with hepatitis C viral infection in the presence of alcohol intake 286

Fluoxetine
effect of a small dose of, in combination with naltrexone and a TRH analogue, on alcohol intake in three strains of alcohol-preferring rats 76

Flushing
application of cross-impact analysis to the relationship between, syndrome and the aldehyde dehydrogenase 2 allele 55
facial, as a low risk factor for alcohol dependence 190

Follow-up study
attrition in a, of DWI offenders: who is lost? 464

Forensic application
of the determination of ethyl glucuronide in hair samples, in monitoring alcohol consumption: a letter to the Editors 313

Forskolin
stimulated adenylyl cyclase activity in lymphocytes of alcoholic patients as a function of age 249

Gender
and peripheral neuropathy in chronic alcoholism: a clinical–electroneurographic study 368
differences in alcohol-induced aggression 471
differences in suicide among alcohol misusers and non-misusers in a Finnish nationwide survey 70

General practitioners
alcohol education for, in the UK — a window of opportunity?: an Invited Review 225

Genetics
gene expression of rat liver tryptophan pyrrolase during the alcohol-withdrawal syndrome 427
the Collaborative Study on the, of Alcoholism (COGA): responses to alcohol in daughters of alcoholics – a pilot study and a comparison with the sons of alcoholics 242

Germany
calculations of the long-term cost-effectiveness of improving alcohol abstinence with adjuvant acamprosate 478

Glucocorticoids
changes in gene expression of, receptor during the alcohol-withdrawal syndrome in rat liver 427
rat serum corticosterone concentrations during the alcohol-withdrawal syndrome 427

Glycation
of histone, effect of ethanol on, in diabetic rats 145

Growth hormone
acute effects of in alcohol-fed rats 148

Growth hormone receptor
modulation of by growth hormone in control and alcohol-treated rats 148

GTPγS
stimulated adenylyl cyclase activity in lymphocytes of alcoholic patients as a function of age 249
Haem-biosynthetic pathway
effects of alcohol (ethanol) on enzymes of in man and animals 109
Haemolysis
increased, of erythrocytes from alcoholics and protection against by carnosine and *N*-acetylcarnosine 44
Hair
determination of ethyl glucuronide in samples of, as a potential method of monitoring alcohol consumption: a letter to the Editors 313
ethyl glucuronide in human, in alcohol-drinking subjects 283
HCV
drinking habits of subjects wi'h, -related chronic liver disease: prevalence and effect on clinical, virological and pathological aspects 296
effects of alcohol intake on progression of, infection and risk of hepatocellular carcinoma in Japanese patients 286
Heart
changes in, rate during assessment of autonomic reactivity to mental stressors after single administration 617
role of acetaldehyde in the induction by ethanol of left ventricular atrial natriuretic peptide (ANP) gene expression in rats 331
Heavy drinking
stressors as predictors of 307
Hepatic porphyrias
exacerbation by alcohol 109
Hepatic steatosis
reversal of ethanol-induced, and lipid peroxidation by taurine: a study in rats (letter to the Editors) 215
Hepatocellular carcinoma
risk of with progression of hepatitis C viral infection in, Japanese patients and the effect of alcohol intake 286
Hepatocytes
activated macrophages increase the susceptibility of rat, to ethanol-induced oxidative stress: conflicting effects of nitric oxide 230
Heroin addicts
side-bias in, and alcoholics 381
High trait anxiety
as a significant risk factor for alcohol dependence 190
Histone
effect of ethanol on glycation of, in diabetic rats 145
History of alcoholism
a review of in relation to the twentieth century 10
Home detoxification
from alcohol, a comparison of and hospital-based day-patient 66
Homocysteine
elevated plasma levels of, in alcohol withdrawal 351
Horny layer
presence of ethyl glucuronide in specimens of, from alcohol-drinking subjects 283
Hospital-based day-patient detoxification
a comparison of with home detoxification 66
Hungary
problem drinking among hospitalized patients in 574
α-Hydroxyethyl radical
adducts of, with proteins in liver and blood of rats fed the Lieber–DeCarli ethanol-containing liquid diet 164
5-Hydroxytryptamine
platelet uptake of is higher in early-onset, than late-onset alcoholics 390
Hyperhomocysteinaemia
possible role of in alcohol withdrawal (a letter to the Editors) 215
Hypokalaemia
alcohol withdrawal and, a case report 188
Hyponatraemia
mechanisms of, in alcoholic patients 612
Identification
of high-risk mothers through the diagnosis of their children, in the primary prevention of the fetal alcohol syndrome through diagnosis 499
opportunistic, of excessive drinkers: a study of reliability of a Spanish version of the Readiness to Change Questionnaire in 270
IGF binding protein
effects of acute growth hormone administration on in control and alcohol-treated rats 148
Immunohistochemistry
use of in demonstrating acetaldehyde–protein adduct formation in rat brain after lifelong consumption 458
Implementation
and dissemination of methods for prevention of alcohol problems in primary health care: a feasibility study 525
Impulsivity
relationship to alcohol dependence 190
Information processing
alcohol impairs speed of, and simple and choice reaction time, and differentially impairs higher order cognitive abilities 197
Inspection time
effects of alcohol on, as a measure of the early stages of information processing 197
Insulin-like growth factor I (IGF-I) system
modulation of by growth hormone in control and alcohol-treated rats 148
Interferon therapy
better response to, in subjects with HCV-related chronic liver disease, after abstention or reduction of alcohol consumption 296
Intervention
brief, compliance rate and associated factors for entering an alcohol treatment programme of 372
Intestinal absorption of acamprosate
a kinetic study of, in the rat *in vitro* 324
Intestinal lymphocytes
of intraepithelial lamina propria in the rat following placental and lactational exposure to ethanol 25
Kupffer cells
role of, in the release of nitric oxide and change of portal pressure after ethanol perfusion in rat liver 31
[lactate]/[pyruvate] ratio
effects of methylene blue on disturbance of, by ethanol in rat isolated hepatocytes and human blood 424
Lactobacillus
acetaldehyde production and metabolism by human indigenous and probiotic strains of *Bifidobacterium* and 561

Laterality
in alcoholism and its typologies 394
relationship to alcohol dependence 190
Lateralization
impairment in patterns of in alcoholics 381
Lesch's typology
of alcoholism, and abnormal hemispheric organization 394
Leukocytes
effects of placental and lactational exposure of rats to ethanol on influx of intraepithelial and lamina propria 25
Life events
the role of in predicting drinking behaviour 307
Lipid peroxidation
indices of in alcoholic patients in relation to cytochrome *P*-450 2E1 induction and oxidative stress 98
reversal of ethanol-induced hepatic steatosis and, by taurine: a study in rats (a letter to the Editors) 215
Lipids
naltrexone exerts a favourable effect on levels of plasma, in abstinent patients with alcohol dependence 91
Lipopolysaccharide
role of activation of macrophages by, and interferon-γ in increasing the susceptibility of rat hepatocytes to ethanol-induced oxidative stress: conflicting effects of nitric oxide 230
Liver
Hep G2 cell apoptosis induced by ethanol and the role of activation of sphingomyelinase 569
rat, role of Kupffer cells in the release of nitric oxide and change in portal pressure after ethanol perfusion of 31
Liver disease
HCV-related chronic, prevalence of drinking habits of subjects with, and effect on clinical, virological and pathological aspects 296
Liver microcirculation
role of Kupffer cells in changes in, during the early stage of ethanol exposure 31
Liver volume
correlation of in patients with body weight and alcohol consumption 531
Long-stay
comparison with short-stay for outcome after in-patient detoxification for alcohol dependence 580
Longitudinal
study of drinking patterns among Swedish women: results from a 5-year follow-up study of a population-based study 520
Lorazepam
autonomic reactivity to mental stressors after single administration of in male alcoholics and healthy controls 617
Lung cancer
risk of is associated with serum carotenoids among alcohol drinkers, but not among non-drinkers, in a cohort of tin miners 355
Macrophages
activated, increase the susceptibility of rat hepatocytes to ethanol-induced oxidative stress: conflicting effects of nitric oxide 230
Malondialdehyde
adducts of, with proteins in liver and blood of rats fed the Lieber–DeCarli ethanol-containing liquid diet 164
Markov chain
analysis of and frequency of the amino acid sequence of human alcohol dehydrogenase α-chain 302
Medical Council on Alcoholism
a tribute to, and to its journal as we enter the new millennium: an Editorial 1 and its journal *Alcohol and Alcoholism*: an invited special article by a previous Editor 3
Medical education
of UK general practitioners about alcohol misuse: an Invited Review 225
Mental stressors
autonomic reactivity to, after single administration of lorazepam in male alcoholics and healthy controls 617
Meta-analysis
use of in quantification of alcohol-related mortality in Sweden 601
Metallothionein
synthesis of in livers and kidneys of rats continuously exposed to cadmium and the effect of short-term ethanol administration 439
Methylene blue
effects of on ethanol disposition in human volunteers and rats 424
Microdialysis
a study of the effects of ethanol on extracellular amino acid levels in high- and low-alcohol sensitive rats 548
Microtubule-associated proteins
(MAPs): low levels of ethanol stimulate and high levels decrease phosphorylation in, of rat brain: an *in vitro* study 452
Misusers and non-misusers of alcohol
differences between, in relation to suicide in a Finnish nationwide survey 70
Moderate alcohol consumption
effects of on female hormone levels and reproductive function: a review 417
Monoamine oxidase (MAO)-B
alcoholics with the dopamine DRD2 receptor A1 allele have a lower activity of, than those with the A2 allele: a preliminary study 493
low activity of in platelets of alcohol-dependent patients with neuroendocrine evidence of decreased dopamine (DA) 2 receptor function: a letter to the Editors 210
transient increase in activity of in platelets during early abstinence in alcoholics: implications for research 377
Moral panic
the origins of, in relation to the fetal alcohol syndrome 276
Morphometric changes
in terminal dendritic segments of cerebellar Purkinje neurons of ageing and ethanol-treated F344 rat 35
Mortality
quantification of alcohol-related, in Sweden 601
mRNA
changes in, of manganese superoxide dismutase (Mn-SOD) in experimental chronic alcoholism: role of vitamin E supplement 159
***N*-Acetylcarnosine**
effects of, and carnosine, on the stability and morphology of erythrocytes from alcoholics 44
[NADH]/[NAD+] ratio
possible effect of, on the acute alcohol-induced increase in plasma testosterone in premenopausal women 84
Naltrexone
a multicentre, randomized, double-blind, placebo-controlled trial of naltrexone in the treatment of alcohol dependence 587

effect of a small dose of, in combination with fluoxetine, and a TRH analogue, on alcohol intake in three strains of alcohol-preferring rats 76
favourable effect of, on plasma lipids in abstinent patients with alcohol-dependence 91
Neurobiology
of alcoholism, research on in the twentieth century 10
Neurotoxicity
possible role of acetaldehyde–protein adduct formation in rat brain after lifelong consumption of ethanol 458
New millennium
a tribute to the Medical Council on Alcoholism and its journal as we enter the new millennium 1
Nicotine dependence
clinical correlates of cigarette smoking and, in alcohol-dependent men and women 171
Nitric oxide (NO)
activated macrophages increase the susceptibility of rat hepatocytes to ethanol-induced oxidative stress 230
role of Kupffer cells in the release of, and change of portal pressure after ethanol perfusion in rat liver 31
NMD receptors
possible modulation of during alcohol withdrawal by elevated levels of homocysteine and other agonists 351
Nurses
general practice, knowledge of alcohol use and misuse: a questionnaire survey 259
Oral contraceptives
effects of acute alcohol intake on plasma androgen levels in women on and off 84
Organizational abilities
deficits in, in problem drinkers 52
Outcome
after in-patient detoxification for alcohol dependence: a naturalistic comparison of 7 versus 28 days 580
Oxidative stress
activated macrophages increase the susceptibility of rat hepatocytes to ethanol-induced: conflicting effects of nitric oxide 230
relationship of parameters of, and induction of cytochrome *P*-450 2E1 (CYP2E1) in alcoholic patients 98
Papillary muscle
mechanical properties of, from rat left ventricles, after addition of acetaldehyde in control and chronic ethanol-ingesting rats 554
Parental alcohol problems
as a significant risk factor for alcohol dependence 190
Passive diffusion
as the major mechanism of acamprosate absorption by rat small intestine 324
Patient needs
and science and practice: the work of the Plinius Maior Society 16
Per capita consumption
as a strong predictor of changes in alcohol problem indicators 255
Peripheral neuropathy
gender and in chronic alcoholism: a clinical–electroneurographic study 368
Pharmacotherapy
of alcohol dependence and its effect on plasma lipids: a comparison of naltrexone with carbamazepine, lithium carbonate and placebo 91
of alcoholism: gaps in knowledge and opportunities for research: a Review 537
Phosphorylation
low levels of ethanol stimulate and high levels decrease, in microtubule-associated proteins in rat brain: an *in vitro* study 452
Placental
and lactational exposure to ethanol and the numbers of intestinal intraepithelial and lamina propria lymphocytes in the rat 25
Plasminogen activator inhibitor
changes in after alcohol consumption with or without an evening meal 594
Platelet aggregation
shear-induced: effects of alcohol and an evening meal on, and on urinary excretion of prostanoids 594
Platelets
serotonin uptake by, is higher in early-onset alcoholics, than late-onset 390
Plinius Maior Society
for research and treatment of alcoholism in Europe: the work of, in relation to science, practice and patient needs: an invited special article 16
Polymorphism
of aldehyde dehydrogenase and the flushing syndrome: application of cross-impact analysis to the relationship between 55
Porphyrias
clinical and metabolic features of, in a review on alcohol and porphyrin metabolism 109
Portal vein pressure
role of Kupffer cells in the release of nitric oxide and change in, after ethanol perfusion in the rat liver 31
Potassium levels
a recommendation of their measurement during alcohol withdrawal 188
Precipitant
alcohol as, of porphyria 109
Preconceptional
effects of chronic moderate alcohol consumption in female mice on preimplantation *in vivo* embryo development 336
Pregnancy
effects of, and of progesterone, on the consumption of ethanol by the high ethanol-preferring (HEP) rat 344
Prevalence
of problem drinking among hospitalized patients in Hungary 574
Prevention
implementation and dissemination of methods for, of alcohol problems in primary health care: a feasibility study 525
of alcohol-related birth defects in the context of the moral panic towards the fetal alcohol syndrome 276
Primary cell culture
ethanol inhibits skeletal muscle cell proliferation and delays its differentiation in 236
Primary health care
a measure of the intensity of response to alcohol to screen for alcohol use disorders in 625
as a setting for brief intervention programmes for alcoholism treatment, and compliance rate and associated factors for entering 372

implementation and dissemination of methods for prevention of alcohol problems in: a feasibility study 525
the role of general practice nurses in identification of alcohol problems in 259
role of education of general practitioners, in identification and treatment of alcohol misuse: an Invited Review 225
Primary prevention
of the fetal alcohol syndrome through diagnosis. II. A comprehensive profile of 80 birth mothers of children with fetal alcohol syndrome 509
of the fetal alcohol syndrome through diagnosis: I. Identification of high-risk birth mothers through the diagnosis of their children 499
Probability
a comparison of measured and estimated, in the analysis of the amino acid sequence of human alcohol dehydrogenase α-chain 302
Problem drinkers
dissociable cognitive impairments in 52
Problem drinking
among hospitalized patients in Hungary 574
Progesterone
effects of pregnancy and of, on the consumption of ethanol by the high ethanol-preferring (HEP) rat 344
Proliferation
ethanol inhibits skeletal muscle cell, and delays its differentiation in cell culture 236
Prostaglandin
role of, in mediating the effects of nitric oxide produced by activated macrophages on susceptibility of rat 230
Prostanoids
effects on urinary excretion of, of alcohol and food intake 594
Protein adducts
of direct and indirect ethanol metabolites in liver and blood of rats fed the Lieber–DeCarli ethanol-containing diets 164
Psychological dependence
forced ethanol treatment stimulates and inhibits ethanol intake in a rat model of 446
Psychosocial development
the specificity of disrupted processes of in families of adult children of alcoholics 361
Purkinje neurons
cerebellar, with altered terminal dendritic segments are present in all lobules of the cerebellar vermis of ageing and ethanol-treated F344 rats 35
Questionnaire survey
of general practice nurses' knowledge of alcohol use and misuse 259
Randomized controlled trial
of naltrexone in the treatment of alcohol dependence and abuse, with a multicentre double-blind and placebo control 587
Rats
basal, and ethanol-induced changes in high-alcohol sensitive (HAS), levels of extracellular amino acids in nucleus accumbens microdialysates in, in comparison with low-alcohol sensitive (LAS) rats 548
effects of pregnancy and progesterone on the consumption of ethanol by high ethanol-preferring (HEP) 344
evidence of acetaldehyde–protein adduct formation in brains of AA and ANA, after lifelong consumption of ethanol 458
Reaction
level of responding to an acute alcohol challenge by daughters of alcoholics – a pilot study and a comparison with sons of alcoholics 242
Reaction time
alcohol impairs speed of information processing and simple and choice, and differentially impairs higher order cognitive abilities 197
Readiness to Change Questionnaire
reliability study of its Spanish version 270
Redox changes
in the NAD couple, caused by ethanol in man and rat and their modulation by methylene blue 424
Refusal bias
factors determining refusal to enrol in a follow-up study of DWI offenders 464
Relapse
a rat model of alcohol dependence relevant to loss of control and relapse, in which forced ethanol treatment stimulates and inhibits ethanol intake 446
United Kingdom Multicentre Acamprosate Study (UKMAS): a six-month prospective study of acamprosate versus placebo in preventing, after withdrawal from alcohol 176
Relapse prevention
acamprosate and, in the treatment of alcohol dependence: a placebo-controlled study 202
the role of valproate in and in treatment of sedative–hypnotic withdrawal, a review 319
Reproductive function
effects of moderate alcohol consumption on female hormone levels and: a review 417
Reset osmostat
and the hyponatraemia of alcoholic patients 612
Response to alcohol
a measure of the intensity of, to screen for alcohol use disorders in primary care 625
Right side-bias
reduction of in alcoholics 381
Ritanserin
effects of (a 5-HT_2 receptor antagonist) on mood, sleep, vigilance, clinical impression and social functioning in alcohol-dependent individuals 384
Sarcoplasmic reticulum
reduction in the calcium loading state of, in mouse skeletal muscle fibres *in vitro*, as a possible mechanism of ethanol-induced decrease in calcium ion transients 134
Screening
a new diagnostic instrument, the 4-digit diagnostic code, for diagnosing the full spectrum of fetal alcohol exposed individuals 400
for alcohol use disorders in primary care using a measure of the intensity of response to alcohol 625
Sedative–hypnotic withdrawal
a review of the role of valproate in the treatment of, and for relapse prevention 319
Serotonin
platelet uptake of is higher in early-onset, than late-onset alcoholics 390

Short-stay
comparison with long-stay for outcome after in-patient detoxification for alcohol dependence 580
Skeletal muscle
ethanol inhibits cell proliferation and delays differentiation of, in primary cell culture of 236
fibres, of mice, acute ethanol treatment of, *in vitro* decreases intracellular calcium ion transients 134
Skin swabs
presence of ethyl glucuronide in, of alcohol-drinking subjects 283
Smoking
clinical correlates of cigarette, and nicotine dependence in alcohol-dependent men and women 171
Social problems
the role of, in the fetal alcohol syndrome and the moral panic towards 276
Sons
of alcoholics: response to alcohol in daughters of alcoholics – a pilot study and a comparison with, of alcoholics 242
Spanish version
of the Readiness to Change Questionnaire: a reliability study of 270
Sphingomyelinase
activation of neutral, participates in ethanol-induced apoptosis in Hep G2 cells 569
Spontaneous abortion
possible usefulness of the female high ethanol-preferring (HEP) rat as an animal model for the study of 344
Steroid metabolism
disturbance of, by acute alcohol intake in relation to changes in plasma androgen levels 84
Streptozotocin
-induced diabetes in rats, effect of ethanol on histone glycation 145
Stressors
as predictors of abstinence and/or heavy drinking 307
role of in the disrupted processes in families of adult children of alcoholics 361
Substance use
a comparison of, between female inmates and female substance misusers in treatment 60
Suicide
a Finnish nationwide survey of, in alcohol misusers and non-misusers 70
Sulphur-containing amino acids
possible role of as antagonists of the hyperexcitability of the alcohol-withdrawal syndrome (a letter to the Editors) 215
Superoxide dismutase
manganese, regulation of in experimental chronic alcoholism effects of vitamin E-supplemented and -deficient diets 139
Sweden
drinking patterns among Swedish women: results from a 5-year follow-up of a population-based study 520
quantification of alcohol-related mortality in 601
Taurine
inhibition by, of acamprosate absorption by rat small intestine *in vitro* 324
potential value of in antagonism of the symptoms of the alcohol-withdrawal syndrome, reversal of ethanol-induced hepatic steatosis and lipid peroxidation by: a study in rats (a letter to the Editors) 215
Thai men
patterns of alcohol consumption by 263
Tin miners
serum carotenoids are associated with increased lung cancer risk among alcohol drinkers, but not among non-drinkers, in a cohort of in China 355
Tolerance
to ethanol, are anandamide and cannabinoid receptors involved in, a review of the evidence 126
Total life dose of ethanol
as a factor in peripheral neuropathy in chronic alcoholism 368
Training
the need for, of general practice nurses in identification of alcohol problems in primary care 259
the need for, of UK general practitioners about alcohol: an Invited Review 225
Treatment
a comparison of substance use by female inmates with female substance misusers in 60
acamprosate and relapse prevention in, of alcohol dependence: a placebo-controlled study 202
compliance rate and associated factors for entering an alcohol programme of brief intervention 372
is single daily dosage of diazepam as effective as chlordiazepoxide in divided doses in, of alcohol withdrawal — a pilot study: a letter to the Editors 212
new, of alcoholism in a review of alcoholism in the twentieth century 10
of alcohol dependence with naltrexone in a multicentre, randomized, double-blind and placebo-controlled trial 587
of alcoholism: a review of pharmacotherapy: gaps in knowledge and opportunities for research 537
role of valproate in, of sedative–hypnotic withdrawal and for relapse prevention, a review 319
Trends
of changes in population-based alcohol problem indicators can be predicted by drinking surveys 255
TRH analogue
(TA-0910), effect of a small dose of, in combination with fluoxetine, and a TRH analogue, on alcohol intake in three strains of alcohol-preferring rats 76
Tryptophan
a pilot investigation of the effect of tryptophan manipulation on the affective state of male chronic alcoholics 49
effect of manipulation of, /large neutral amino acid ratio by diet, on the affective state of male chronic alcoholics 49
pyrrolase activity and gene expression of, in rat liver, during the alcohol-withdrawal syndrome 427
Tyrosine aminotransferase
activity and gene expression of, in rat liver, during the alcohol-withdrawal syndrome 427
Unilateral activity
reduction in right side-bias in, of alcoholics 381
Uptake
platelet serotonin is higher in early-onset, than late-onset alcoholics 390

Uroporphyrinogen decarboxylase
effects of alcohol on 109
Ventricular myocytes
properties of and the effect of addition of acetaldehyde to preparations from control and chronic ethanol ingesting mice 554
Visuo-spatial abilities
deficits in, in problem drinkers 52
Vitamin E
regulation of manganese superoxide dismutase (Mn-SOD) in chronic experimental alcoholism: effects of 159
Voluntary ethanol intake
changes in induced by forced ethanol treatment in a rat model of alcoholism 446
von Willebrand factor multimers
increase in by alcohol and food intake 594
Withdrawal symptoms
possible mediation of alcohol by homocysteine and related compounds 351
Women
acute effects of alcohol on plasma androgen levels in premenopausal 84
response to alcohol in daughters of alcoholics – a pilot study and a comparison with sons of alcoholics 242
